*Hello Ashraf*

*I hope my note finds you well.*

*Because I know you manage your work with your phone I will send you a few short messages.*

*The recent field work I completed confirms the suppositions in my research data that the Southern Passage has the same height and breadth dimensions as the the Ark of the Covenant box. The average reading I recorded were 792.5 millimetres, the equivalent of 1.5 royal cubits.*

*I also confirmed the presence of the bore hole left by the French scientific team 1989 which detected sand beyond the stone block which seals the passage.*

*Your archaeologist Ahmed has received the presentation of my research and 'believes in my project.' When I was with he committed to meet with the project leader to initiate the scanning of the south wall which should be 'achievable within current budgets.'*

*Please give Ahmend your support, so we can scan and know if I am "speaking the Truth," as you have said in the past.*

*U [REDACTED]  
family.*

*Time is running out. Find the Ark and you find Khufu.*

*Important:*

*It has been four years since I began sharing my research exclusively with the Ministry of Antiquities Egypt and three years since your people agreed carry out the scans.*

*I feel that this has been a reasonable time for your government to take affirmative action. So, on July 18 2024 I have decided to publish my data to scientific journals and world media. I tell you this in advance because of the serious Religious and Geopolitical implications which could follow.*

*Please make every effort to complete the task. In the future I hope to say that "my friend Dr Ashraf Mohie is a man of action."*
